Activity Title	Activity Description	TCB Category	
Improved Policy Environment for Trade in Chad: Budget Policy	The College de Controle et Surveillance des Ressources Petroliere (CCSRP) oversees the use of petroleum revenue in Chad. Currently, CCSRP must rely on a cursory and tedious review of documents that ensure only that numbers match, rather than that the funds are used in legal and regular manner. The CCSRP is waiting for implementation of a large financial management system to automate some of the processes. The first need is that the paper system be automated using simple procedures and basic word processing and spreadsheet packages. The next task is to coordinate with the Ministry of Finance on the development of the larger system. In general, there is no one in Chad possessing the necessary background and expertise to implement such a system. Due in part to the high visibility of the project, the international community is looking at CCSRP as a model for other extractive industry countries. Funded and implemented by Department of Treasury/OTA.	Financial Sector Dev. & Good Governance	474,412
		Activity Total	474,412
