Activity Title	Activity Description	TCB Category	
Transport Infrastructure Project	(1) Transport Infrastructure Upgrading and Construction: Overcoming transport infrastructure constraints to poverty reduction and economic growth, specifically for rural areas, has been consistently identified as a major impediment to economic growth in Vanuatu. The Government recognizes the importance of adequate and reliable transport infrastructure services as well as the negative impact the poor transportation infrastructure has had on formal economic activity and investment in the agriculture and tourism sectors. The Project is intended to reduce transport costs and improve reliability of access to prioritized roads, wharfs and airstrips, and thereby alleviate one of the principal constraints to private sector development. (2) Civil Works Infrastructure Activity: This activity helps fund civil works for the reconstruction or construction of priority infrastructure on eight islands, covering roads, wharfs, airstrips and warehouses. Funded and implemented by Millennium Challenge Corporation.	Physical Infrastructure Development	54,500,000
		Activity Total	54,500,000
