Business Environment Improved in Jamaica	One principal aim of the business environment activity is the creation of opportunities for small- and medium- sized firms in the tourism, agribusiness and entertainment and culture clusters, with further emphases on the underserved sub- sectors. Technical assistance focuses on investing in human capital with targeted training interventions that are driven by the needs of the clusters and the community, so as to develop skill sets that are immediately marketable. This activity will also create a more enabling business environment through targeted private sector driven interventions in the regulatory processes that affect businesses, for example through the preparation of a Developers Manual, and through a series of workshops that will help small, medium and micro enterprises access financing. Competitiveness Clusters Developed in Jamaica	Recognizing that country competitiveness determines prosperity, and that competitiveness is determined by the ability of firms to provide unique products and services to customers, this activity focuses on competitive industries as the principal framework for industry sector and firm level assistance aimed at improving competitiveness. Activities are concentrated in three clusters (tourism, business management, entertainment and culture) and include technical assistance to facilitate the development of public/private partnerships and private sector partnerships throughout the value chain of firms, with the objective of generating networking benefits and enhancing the productivity of clusters. This technical assistance also includes, at the firm level, training in business management and technical skills assistance with the making of market linkages and joint procurements. Integrated Pest Management Collaborative Research Support Program	Ecuador: Technologies implemented to control vascular wilt, late blight, root knot nematode and fruit borer of naranjilla. Disease resistant varieties of cocoa were made available. Pest mites on eggplant and strawberry controlled by predaceous mites in Honduras. Eggplant was grafted on resistant rootstocks for control of bacterial wilt. Resistant varieties were introduced and host-free period increased tomato production in Mali. In Tanzania and Uganda, control of coffee pests was implemented.	Agreement on Sanitary and Phyto-Sanitary Measures (SPS)	39,488

Technical Assistance to the Caribbean Regional Negotiating Machinery	Technical assistance is being given to the Caribbean Regional Negotiating Machinery (CRNM) to improve its effectiveness and success in negotiating trade agreements on behalf of the Caribbean Community (CARICOM). Activity focus includes trade in services, regional coordination for the Free Trade Agreement of the Americas (FTAA) and bilateral trade programs, enhancement of the private sector role in international trade agreements, and strengthening of the CRNM financial management system. Other specific activities in the services area are being carried out with support from other donors of the CRNM services program. In the area of private sector involvement, several seminars have been conducted to date in the region to improve awareness on issues which are germane to trade agreements being negotiated. Private sector contributions to the negotiations are therefore expected to increase as a result of the program.	WTO Awareness	90,001
