Integrated Pest Management Collaborative Research Support Program	In FY 09, the IPM CRSP developed and promoted several technologies that aided export agriculture in its host countries. In Ecuador a beneficial bacterium has been developed as a spray to protect cocoa pods from fungal disease. In Honduras a hot water treatment for planting material is being promoted to prevent mites from establishing damaging populations. Also in Honduras adoption of grafting is increasing yields of eggplant for export by extending the length of the harvest period.	Trade- Related Agriculture		3,344
