Lebanon Agricultural Product Quality Control and Certification Program	The program will sustainably expand the availability and quality of accredited and certified laboratories and plants, and the market-oriented services they provide. The program will provide product development services, technical assistance, export standards, market specifications, certifications and certified laboratory analysis so that products from small, medium, and large scale agro-food producers and processors meet and comply with a wide range of export markets. Lebanon Description for 2009: Testing and product facilities provide essential services to the food industry; without them it is impossible to meet buyer requirements for quality and safety, or consumer demand for innovation. The state of the current network of facilities in Lebanon is insufficient to support the long-term growth of this industry, particularly as markets increasingly require compliance with internationally recognized quality standards.
